BUTTER SCORING PLANS FOR 1922

Program Will Be Carried Out at Creameries in Various Sections of the State.

Educational butter scorings were held at the college of agriculture, University of Vermont, during 1918 and 1919 and at the college and various creameries in different parts of the state in 1921. The extension service of the college and the state department of agriculture co-operated in conducting those scorings and several hundreds of samples were entered.

The 1921 plan of holding scorings at creameries in various sections of the state was especially successful for it enabled several hundred persons to attend one or more of the meetings which they could not have done had the scorings been held in Burlington. The interest shown last year and requests thus far received warrant continuation of this plan for the present season.

A new feature is to be added this year in connection with the butter scorings at such creameries as request it, viz. a cream scoring of the cream delivered by patrons of the creamery and others who may send in samples. Samples of cheese of any variety may be sent to any scoring to be scored.

Beginning April 28 it is planned to hold monthly scorings throughout the year. A part of these will be held at the college of agriculture and the others in different parts of the state. Creamerymen desiring meetings to be held at their plants should make requests early. While location must be considered of first importance, those from whom requests are first received will be given preference insofar as possible. Sections of the Vermont Dairy Plant Operators and Managers' association may arrange to have these scorings held at one of their meetings and as part of their program if they so desire.

Plans have been made for Professor Ellenberger, head of the college dairy department, or Mr. Jones, dairy manufacturing specialist of the state department of agriculture, or both to act as judges at these scorings. It is also expected that arrangements will be made whereby practical butter men from some of our market centers may be present and judge at most of the scorings.

Analysis of each sample will be made by a state creamery inspector of the state department of agriculture. The salt and water content will be determined and one per cent will be allowed for curd the balance being reported as fat.

Several patrons have expressed a desire to donate a five-pound box of butter toward a fund to be used for prizes at the end of the year. Any who desire to contribute in this way should so state on their entry blank and the proceeds from that entry will be added to the fund.

Those intending to send samples to any of the scorings should read carefully the rules governing same, a copy of which is attached hereto. Announcement of the time and place of each scoring will be sent out in advance.

QUICK RELIEF FROM CONSTIPATION

Get Dr. Edwards' Olive Tablets

That is the joyful cry of thousands since Dr. Edwards produced Olive Tablets, the substitute for calomel. Dr. Edwards, a practicing physician for 17 years and calomel's old-time enemy, discovered the formula for Olive Tablets while treating patients for chronic constipation and torpid livers.

No griping is the "keynote" of these little sugar-coated, olive-colored tablets. They cause the bowels and liver to act normally. They never force you to strain. If you have a "dark brown mouth"—a bad breath—a dull, tired feeling—sick headache—torpid liver—constipation, you'll find quick, sure and pleasant results from one or two of Dr. Edwards' Olive Tablets at bedtime.

Thousands take them every night just to keep right. Try them. 15c and 50c.
